

QRM Series DTS Controls

Part # DTSM11SRBPL
Raised Base

Part # DTSM22SCH
Flat Base

Introducing Livorsi Marine's New QRM Series Mercury DTS Controls

- The stylish knobs are ergonomically designed to provide a comfortable, but sure grip in all weather conditions
- The automotive look and feel can be matched nicely with several different steering wheels (Carlotta, Gussi, etc..)
- New handle design that provides:
 - Medium handle length for applications where space may be a consideration
 - Internal switch wire routing (No visible trim wire tube)
 - New low-profile trim switch for improved ergonomics

Features

- Two styles to choose from Raised Base (no visible boots) or Flat Base
- Optional throttle and shift functionality instructions etched right into the base plate to make it user friendly for customers
- Available in single engine (2 handle) and twin engine (4 handle)
 - Each handle has only a single function: shift or throttle
- Engines must be Mercury DTS ready
- Shadow Mode compatible
 - Uses 4 control levers to operate 3, 4, 5, or 6 engines
- 11 Colors to choose from & private labeling is available
- Specify configuration of handles (1-4 handles)
